PROFESSIONAL SUMMARY

Detail-oriented and tech-savvy professional with nearly 4 years of experience supporting technical operations, business workflows, customer communication systems, quality assurance, and process documentation for U.S.- and Australia-based teams. Experienced in coordinating with cross-functional stakeholders, documenting end-to-end processes, analyzing workflow dependencies, supporting enterprise systems, troubleshooting technical issues, and identifying opportunities for process improvement. Strong background in Quadient Inspire, Microsoft 365, Business Central, PrintVis, NetSuite, workflow documentation, and production support.

CORE COMPETENCIES & TECHNICAL SKILLS

- **Operations & Process Support:** Workflow Coordination, Process Documentation, SOPs, Requirements Gathering, Cross-Functional Collaboration, Action-Item Tracking, Quality Assurance, Production Support
- **Business Systems & ERP:** Microsoft Dynamics 365 Business Central, PrintVis, Oracle NetSuite, SDLC Ticketing Systems
- **CCM & Document Technologies:** Quadient Inspire Designer, ICM (Inspire Content Manager), Quadient Pulse, Document Composition, Data Mapping, Conditional Logic, Business Rules
- **Productivity & Collaboration Tools:** Microsoft Office, Teams, Outlook, SharePoint, Google Workspace
- **Technical:** SQL (Basic), HTML, Testing, Debugging, Data Validation

PROFESSIONAL EXPERIENCE

Technical Operations & Systems Specialist (Quadient) — TGI Direct

Independent Contractor | April 2026 – August 2026 | Remote, U.S.

- Developed and maintained customer communication templates using Quadient Inspire Designer and ICM, incorporating data mapping, conditional logic, business rules, and reusable resources.
- Supported Microsoft Dynamics 365 Business Central and PrintVis workflow analysis across orders, jobs, production, and accounting processes.
- Created detailed end-to-end process documentation, operational guides, and validation checkpoints to support knowledge transfer and process consistency.
- Documented and analyzed the Healthcare MLE letter workflow, including letter setup, programming rules, proof data, system dependencies, approval milestones, and production-release processes.
- Collaborated with Healthcare, AppDev, Proofing, and technical teams to understand workflow ownership and operational handoffs.
- Identified manual bottlenecks, documentation gaps, and administrative inefficiencies and contributed to future-state workflow improvements focused on process standardization and clearer operational handoffs.
- Performed proof validation, quality assurance, troubleshooting, and document-formatting checks prior to production release.

Technical Support & Workflow Specialist — Integrated Office Solutions Inc.

October 2024 – April 2026 | Full-time

- Designed, developed, and maintained enterprise Customer Communication Management (CCM) solutions using Quadient Inspire Designer.
- Implemented complex data mapping, conditional logic, business rules, and personalized variable-document workflows.
- Performed production support, troubleshooting, pre-deployment testing, and quality validation.
- Created and maintained technical documentation, workflow guides, and operational reference materials.
- Coordinated with project teams to gather requirements, resolve workflow issues, and maintain clear task ownership and communication.
- Supported reliable production delivery through detailed data and document validation.

Technical Documentation & Systems Associate / Inspire Designer Programmer — SP One Source Solutions Inc.

November 2022 – October 2024 | Full-time

- Built and maintained automated document-composition solutions and business logic using Quadient Inspire Designer.
- Configured data mappings and business rules for variable customer communications.
- Conducted testing, debugging, and quality assurance to ensure accurate and production-ready output.
- Prepared technical documentation, process information, and system logic records for client communication projects.
- Maintained organized digital project assets and supported day-to-day technical project execution.

EDUCATION

Bachelor of Science in Information Technology — Polytechnic University of the Philippines – San Pedro Campus (2018 – 2022)
